Proposal for Collaboration

Name of applicant and co-applicant(s) from the same institution, including affiliations and contact details.
Please ensure that a full postal and **email address** is included for **each applicant.**
PhD student applicants **must** include their supervisors as a co-applicant and provide their full contact details.

Name of the authorized institutional representative, including affiliation and contact details.
Please ensure that a full postal address and a valid institutional e-mail address are included.

Title of your planned project
In less than 30 words.

Data Set Requested
Please indicate which EGA dataset you require (Study ID (EGAS))

Research Question
Please provide a **clear** description of your project and its specific aims in no more than 750 words. This should include specific details of **what you plan to do with the data** and include key references.

Feasibility
Please describe fully your experience and expertise,and how this will be applied to the proposed study.

Technical measurements
Please describe fully your technical measurements for data protection at your institution and how this will be applied to the requested data set.

My institution/research group has a modern, up to date, IT security policy. Only individuals who are listed in this application will have access to the datasets. If copies of the datasets are stored locally on a computer system or a file server, then they must be protected by individual strong passwords and encryption protected so that only the individual's named in the application have access to it. If the computer that holds the datasets is backed up, the backup media must be encrypted and/or stored in a physically secure location.
